INSTRUCTIONS FOR USE
DUPIXENT® (DU-pix-ent) (dupilumab)
injection, for subcutaneous use
Single-Dose Pre-filled Syringe with Needle Shield

Read this Instructions for Use before using the DUPIXENT Pre-filled Syringe. Do not inject yourself or someone else until you have been shown how to inject DUPIXENT. Your healthcare provider can show you or your caregiver how to prepare and inject a dose of DUPIXENT before you try to do it yourself the first time. Keep these instructions for future use. Call your healthcare provider if you have any questions.

This device is a Single-Dose Pre-filled Syringe (called “DUPIXENT Syringe” in these instructions). It contains 200 mg of DUPIXENT for injection under the skin (subcutaneous injection).

The parts of the DUPIXENT Syringe are shown below:

---

### Important Information

- Read all of the instructions carefully before using the DUPIXENT Syringe.
- Ask your healthcare provider how often you will need to inject the medicine.
- In children 12 years of age and older, it is recommended that DUPIXENT be administered by or under supervision of an adult.
- In children 6 months to less than 12 years of age, DUPIXENT should be given by a caregiver.
- Rotate the injection site each time you inject.
- Do not use the DUPIXENT Syringe if it has been dropped on a hard surface or damaged.
- Do not use the DUPIXENT Syringe if the Needle Cap is missing or not securely attached.
- Do not touch the Plunger Rod until you are ready to inject.
- Do not inject through clothes.
- Do not get rid of any air bubble in the DUPIXENT Syringe.
- To reduce the risk of accidental needle sticks, each pre-filled syringe has a Needle Shield that is automatically activated to cover the needle after you have given your injection.
- Do not pull back on the Plunger Rod at any time.
- Do not remove the Needle Cap until just before you give the injection.
- Throw away (dispose of) the used DUPIXENT Single-Dose Pre-filled Syringe right away after use. See “Step 13: Dispose” below.
- Do not re-use a DUPIXENT Single-Dose Pre-filled Syringe.

---

### How should I store DUPIXENT?

- Keep DUPIXENT Syringes and all medicines out of the reach of children.
- Store DUPIXENT Syringes in the refrigerator between 36°F to 46°F (2°C to 8°C).
- Store DUPIXENT Syringes in the original carton to protect them from light.
- DUPIXENT Syringes can be stored at room temperature up to 77°F (25°C) up to 14 days. Throw away (dispose of) any DUPIXENT Syringes that have been left at room temperature for longer than 14 days.
- Do not shake the DUPIXENT Syringe.
- Do not heat the DUPIXENT Syringe.
- Do not freeze the DUPIXENT Syringe.
- Do not put the DUPIXENT Syringe into direct sunlight.

---

### Step 1: Remove

Remove the DUPIXENT Syringe from the carton by holding the middle of the Syringe Body.

⚠ Do not pull off the Needle Cap until you are ready to inject.
⚠ Do not use the DUPIXENT Syringe if it has been dropped on a hard surface or damaged.

---

### Step 2: Prepare

Ensure you have the following:
- the DUPIXENT Pre-filled Syringe
- 1 alcohol wipe*
- 1 cotton ball or gauze*
- a sharps disposal container* (See Step 13)

*Items not included in the carton

---

### Step 3: Check

When you receive your DUPIXENT Syringes, always check to see that:
- you have the correct medicine and dose.
- the expiration date on the Single-Dose Pre-filled Syringe has not passed.

⚠ Do not use the DUPIXENT Syringe if the expiration date has passed.
Step 8: Remove Needle Cap

Hold the DUPIXENT Syringe in the middle of the Syringe Body with the Needle pointing away from you and pull off the Needle Cap.

⚠️ Do not put the Needle Cap back on.

⚠️ Do not touch the Needle.

Inject your medicine right away after removing the Needle Cap.

Step 9: Pinch

Pinch a fold of skin at the injection site (thigh or stomach, except 2 inches around your belly button, or outer area of the upper arm if injected by your caregiver). The figure below shows an example of pinching a fold of skin on your stomach.

⚠️ Do not inject into skin that is tender, damaged, bruised or scarred.
Step 10: Insert
Insert the Needle completely into the fold of the skin at about a 45° angle.

Step 11: Push
Relax the pinch.
Push the Plunger Rod down slowly and steadily as far as it will go until the DUPIXENT Syringe is empty.

*Note: You will feel some resistance. This is normal.*

Step 12: Release and Remove
Lift your thumb to release the Plunger Rod until the Needle is covered by the Needle Shield and then remove the Syringe from the injection site.
Lightly press a cotton ball or gauze on the injection site if you see any blood.

⚠️ Do not put the Needle Cap back on.
⚠️ Do not rub your skin after the injection.

Step 13: Dispose
Put your used Needles, DUPIXENT Syringes, and Needle Caps in a FDA-cleared sharps disposal container right away after use.

⚠️ Do not dispose of (throw away) Needles, DUPIXENT Syringes, and Needle Caps in your household trash.

If you do not have a FDA-cleared sharps disposal container, you may use a household container that is:
- made of a heavy-duty plastic,
- can be closed with a tight-fitting, puncture-resistant lid, without sharps being able to come out,
- upright and stable during use,
- leak-resistant, and
- properly labeled to warn of hazardous waste inside the container

When your sharps disposal container is almost full, you will need to follow your community guidelines for the right way to dispose of your sharps disposal container. There may be state or local laws about how you should throw away used Needles and Syringes.

For more information about safe sharps disposal, and for specific information about sharps disposal in the state that you live in, go to the FDA’s website at: [http://www.fda.gov/safesharpsdisposal](http://www.fda.gov/safesharpsdisposal)

Do not dispose of your used sharps disposal container in your household trash unless your community guidelines permit this.
Do not recycle your used sharps disposal container.

⚠️ Do not put the Needle Cap back on.
